(Opening of the theme by Mr. Snel Alwaris)

Opening of theme

Patients Safety: Highest Priority

Good afternoon & Welcome Everyone for today’s National Webinar.

I, Mr. Snel Alwaris 1st year M.Sc. Nursing student of MGMNB CON, I’m honored and absolutely privileged to speak In front of you all and initiate the proceedings with opening of theme: ***Patients Safety: Highest Priority***.

Thank you for taking out your valuable time and being here today on this platform.

I would like to offer my sincere gratitude and thank our Nursing Director/ Principal Professor Dr. Prabha K. Dasila Madam, Vice Principal Dr. R. Ponchitra, Mrs. Susan Jacob- program coordinator & all my teachers for providing me extremely useful and enlightening opportunity to open the theme for today's Webinar.

The alarming rise in morbidity and mortality among hospitalized patients throughout the World concerns about professional competency. Nurses and other health care professionals are under increased scrutiny to provide safe & effective care. In this light, it becomes an extreme necessity that future nurses who will graduate, are capable of providing safe patient care.

Evidence based practices has shown the increasingly growing magnitude of patient safety concerns in various reports and it's our obligation to gain knowledge of ways to make the health system safer.

So, in response to this highest priority of patient safety, we all have joined in this webinar to ensure that the patient safety is institutionalized as a fundamental principle of the health care delivery system in improving health outcomes.

Today we are going to have 4 enthusiastic sessions of deliberations by 4 eminent expert speakers.

Agenda:

1. To understand Fundamentals of patient safety and its components.

In which main focus will be on to Who's safety is compromised and various factors responsible to ensure effective & safe patient care.

- 2. To recognize the various Types of Errors in healthcare system;** because Patients can be harmed from health care, resulting in permanent injury, increased lengths of stay in hospital and even death. Adverse events occur not because people intentionally hurt patients, but rather due to the complexity of health-care systems, where treatment and care depend on many factors, in addition to the competence of health-care providers, difficulties in recognizing errors, lack of information system to identify the errors, shortage of clinical professionals & other system factors and human factors contributing in safety concerns.

3. **To identify Emerging challenges & provide Strategies to improve patient safety.**

In this emphasis will be on to determine the current challenges faced by health care workers like, detection of errors, reporting, blame culture, defensiveness and secrecy and reduction and mitigation of unsafe acts within the health care system, as well as through the use of best practice to lead optimal patient outcomes and responsibilities of governing bodies to enhance patient safety.

Implementation of international patient safety goals.

4. **To understand the Role of Healthcare team members in patient safety.**

As a health care team member what are the individual level and group level responsibilities of each member in ensuring safe patient care & positive outcomes.

Once a Wise man Said....

*When we take something as a problem,
we become a part of the problem.*

*When we take something as a challenge then
we become a part of solution.*

- The most dynamic speaker for today Dr. Padmaja Dhawale, Associate professor & Nursing Superintendent, MGM hospital, Kamothe to deliberate on first session - **Fundamentals of patient safety and its components.**
- Today we have among us our own charismatic speaker Mrs. Sarika Nair, tutor, MGMNBCON to deliberate on second session that is – **Types of Errors in healthcare system.**
- Third & most important session of **Emerging challenges & Strategies to improve patient safety** will be deliberated by the eloquent and dynamic speaker Mrs. Suparna Patil.

- **Fourth and last session** - Role of Healthcare team members in patient safety will be preached by a very distinguished inspirational speaker Dr. Jyoti Chaudhari

I again extend my warm welcome to everyone who could make it to join this webinar today & I'm confident that, at end of this webinar, you will all leave charged with a deep sense of feeling of patient safety in terms of safe environment & safe care.

Moderator 2 Zayeda khan: Thank you so much Mr. Snel Alwaris for the wonderful opening of the webinar. That was very useful and bring out interest in everyone.
